

Ivan Legac Rudan

Izveštaj s petih laboratorijskih vježbi

Na petim laboratorijskim vježbama smo uz pomoć pythona i wsl-a, ssh i hydre (aplikacije koristene često od strane penetration testera) pokušali izvesti online password guessing napad. Uvjeti za šifru su bili riječ od 4 do 6 malih slova. Izveli smo i broj mogućih kombinacija koji iznosi oko 2^{26} . Potom smo skinuli svoje personalizirane rječnike i uz spomentue alate pokrenuli napad. Nažalost smo imali tehničkih problema pa napad nije uspio.
